There is also offered for sale, two complete sets of the late Prof. Clara E. Cummings' exsiccati, Lichenes Boreali Americani. The sets comprise 280 numbers and are particularly interesting from the fact that for the most part they are illustrative of Tuckerman's specific conceptions. Originally published at \$7.50 per century, they are now offered at \$10.00 per set. In addition to the foregoing, two incomplete sets, the numbers in each comprising 1 to 140, 191 to 210 and 220 to 280, are offered at a price of \$6.00 for each set. The prices are net. Make checks payable to, and address for further particulars,
